JORDAN REED

Bengaluru, India | jordan.reed@example.com | +91 90000 54321 | github.com/jordan-reed | linkedin.com/in/jordan-reed

PROFESSIONAL SUMMARY

Fictional entry-level software engineer focused on Python development, backend fundamentals, API design, testing, and maintainable code. Experienced through academic and personal projects in building small applications, debugging issues, and documenting technical decisions. This sample is intended for testing resume-screening software.

TECHNICAL SKILLS

Languages	Python, Java, SQL
Backend	REST APIs, Flask, JSON, authentication basics
Tools	Git, GitHub, VS Code, Linux, pytest
Core concepts	Data structures, algorithms, OOP, debugging, unit testing

PROJECTS

Task Tracker API | Python, Flask, SQLite

Built a REST API prototype for creating, updating, and deleting tasks. Added input validation, basic error responses, and unit tests for common request paths.

Library Management System | Python, SQL

Designed a small application to track books, members, and loans. Used relational tables and SQL queries to support searching, issuing, and returning books.

Log Analyzer | Python, Regular Expressions

Created a script to parse application logs, count common error types, and summarize events by date to help diagnose recurring failures.

EDUCATION

B.Sc. / B.Tech. in Computer Science (Sample) | 2023–2027

Example University, India — replace with actual details.

ADDITIONAL

Strengths: problem-solving, teamwork, clear documentation, and continuous learning. Languages: English and Hindi.
